

Team members:

Angela Yeung ay2095

Ketan Vanjani kv932

Sunny Jeong sj3048

For this project, all 3 team members completed the project together. The members consistently met up in person and through Zoom meetings for collaborative live coding sessions. In order to collaborate online in the same project, the VS Code Extension Live Share was utilized. Through Live Share, the team members could all code into the same file in the same project at once, allowing us to code together during our meetings. All three members' opinions and perspectives were taken into consideration when completing the project. Angela and Ketan met to complete the application use cases and half of the customer use cases. Sunny, Angela, and Ketan completed the remaining customer use cases and all the airline staff use cases together.

The pdf explaining the files was completed by Ketan Vanjani, the explanations of the Application and Customer use cases was completed by Angela Yeung, and the explanations of the Airline Staff use cases was completed by Sunny Jeong. This pdf explaining the project work distribution was completed by Angela Yeung.
